

2024 Corridor Woodturners Christmas Gift Photos

Bob Ristow constructed four Norwegian Tina boxes for a lady to give as Christmas presents to her children.

The top is basswood that is chip and relief carved, the bent wood box is cherry and is laced. The bottom and posts are attached with a square peg in a round hole.

**Greg Ellyson turned these tree ornaments for friends and family.
Turned from hard maple and colored with India ink markers.**

Greg and Kat Ellyson attended four wood turning club holiday parties. At a couple of the parties you could bring your own table centerpiece. They also used the table centerpiece for a family get together.

The tall tree is made out of Sycamore that Kat won at the Corridor Woodturners holiday party. The medium tree is from a maple branch, and the short tree is hard maple.

**Kevin Lurth
crafted this live
edge walnut
charcuterie board
with pinecone in
resin for his
sister-in-law.**

23.5" x 13.5" x 1.25"

Ray Hamilton turned these trees destined for Christmas gifts for grandkids and a couple of friends.

Ray credits Greg Ellyson for demonstrating the design

bowl from
Maple**

Ron Luckeroth was busy this season. He turned these five segmented lidded bowls for his son, daughter, grandkids, and a friend. They are maple, cherry, and walnut.

**The lanterns are for neighbors, friends, and extras. Various woods.
The angels were made to possibly share with to-be-determined recipients.**

**Tom Nehl turned
this tree,
combining several
turning challenges
into one beautiful
result.**

this delightful
moose to brighten
the holidays.**

Steve Bonny created this vase for his Segmented Woodturners Chapter Christmas swap piece. It was sent to Alan Levin in Sarasota, Florida.

Steve writes: "I was inspired by a Mayuko video to try the mosaic, although I did it a little different to him. My grain is more or less aligned throughout, whereas he used end grain on the mosaic pieces. The mosaic pieces are cherry, cut with an axe! The feature flowers pieces were cut on my CNC and used dyed, stabilized fir and regular holly. The green and black filler are ABS plastic which was applied with a heated pen over a layer of ABS juice to help with adhesion. The black rim is India ink. It is about 8 or 9" tall, finished with spray lacquer. Happy Christmas Alan!"

Tom Mills demonstrated this lantern project at the November club meeting. He made a dozen of these from sycamore, and gave them to members of the musical group he's in. The finish is a metallic wash color.

Tom St. John snapped this photo of the Christmas present he made for his granddaughter. Pretty lucky girl.

Merry Christmas!
